

# SlingStudio™

USB-C EXPANDER

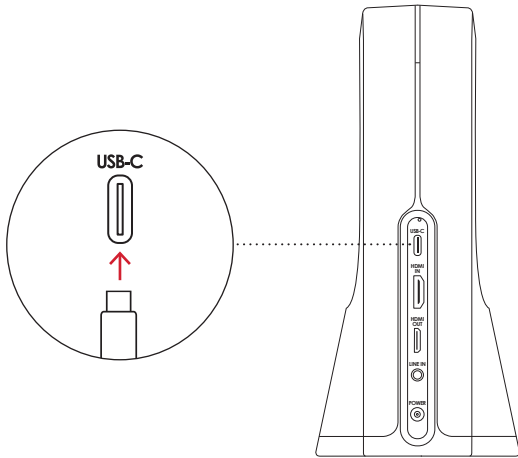

## Quick Start Guide

[MySlingStudio.com](http://MySlingStudio.com)

**1**

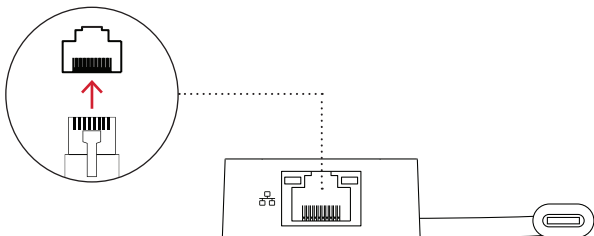

## Connect to the SlingStudio Hub

Connect the SlingStudio™ USB-C Expander to the USB-C port on the SlingStudio Hub.

**2**

## Connect to Ethernet (optional)

If you'd like to livestream your multi-camera production using a high-speed Ethernet connection, connect an Ethernet cable from your modem or router to the Ethernet port on the USB-C Expander.

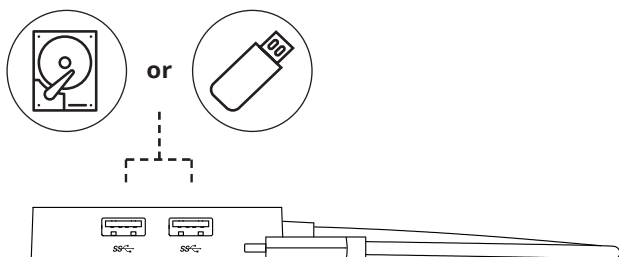

## 3

## Connect to External Storage (optional)

If you'd like to import graphics and/or record your SlingStudio production on an external storage device, connect your supported\* storage device to one of the USB ports on the USB-C Expander as follows:

- *For recording production content* – Use a USB 3.0 external hard drive or solid-state drive with write speeds greater than 40 MB/sec.
- *For importing graphics* – Use a USB 3.0/2.0 external hard drive, solid-state drive or flash drive.

\*Visit [MySlingStudio.com/compatibility](http://MySlingStudio.com/compatibility) to see if your storage device is supported.
